**DETAILED ACTION**

1. Claims 1-8 are pending.

***Election/Restrictions***

2. Restriction to one of the following inventions is required under 35 U.S.C. 121:
  - I. Claims 1-6, drawn to a method of preparing an animal for ischemic optic nerve disease research by injecting photosensitizing agents in its body, classified in class 424, subclass 9.1.
  - II. Claims 7 and 8, drawn to a method of locating specific genes involved in ischemic optic nerve disease, classified in class 424, subclass 9.1.

3. The inventions are distinct, each from the other because of the following reasons:

Inventions of the groups I and II are unrelated. Inventions are unrelated if it can be shown that they are not disclosed as capable of use together and they have different modes of operation, different functions, or different effects (MPEP § 806.04, MPEP § 808.01). In the instant case the different inventions are drawn to methods that have distinct steps and that they require different compositions for practicing the respective methods. For example, in the first method, an ischemic optic disease is produced in a specimen by damaging capillaries feeding the anterior portion of the optic nerve. On the other hand the specimen of group II has an optic nerve disease which could be from any reason and therefore, the symptoms and mechanisms of the optic nerve disease produced in the method of group I would not be the same as in the method of group II. Accordingly, the specimen used in group I and group II would be different.

4. Because these inventions are distinct for the reasons given above, have acquired a separate status in the art shown by their recognized divergent subject matter, and because each invention requires a separate, non-coextensive search, restriction for examination purposes as indicated is proper.

Art Unit: 1632

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a petition under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).

When amending claims, applicants are advised to submit a clean version of each amended claim (without underlining and bracketing) according to § 1.121(c). For instructions, Applicants are referred to <http://www.uspto.gov/web/offices/dcom/olia/aipa/index.htm>.

Applicants are also requested to submit a copy of all the pending/under consideration claims.
